

Speaker Rick Allen of Biological Solutions

Biologically proactive seminars, workshops and presentations are.....

Advanced Credentialed
Consultant

Presentation Synopsis

Improving Profits and ROI with Existing Budget Constraints.

Today's economy requires better return on investment in all operational strategies. Rick demonstrates how budgetary constraints can be a win/win for groundskeepers and turf managers. In Improving Profits and ROI with Existing Budget Constraints Rick demonstrates key strategies for improving the bottom line financial constraints.

Growing Plants while Conserving Water

Conserving water does not mean brown, dormant plants. In this seminar, Rick demonstrates how groundskeepers, turf growers and home-owners are reducing the amount of water needed to grow Super-Bowl style turf and grass.

Employing Non-traditional Approaches in Agricultural Environments

Environmentally friendly approaches to growing are now coming to the forefront as industry and governmental agencies are requiring more organic approaches to growing. Rick demonstrates how growing with earth friendly products can help improve the crop and the environment.

Employing Active Root Development for Turf Management Strategies

Growing the root zone is part of the solution for turf management. Rick demonstrates how healthier root zone, healthier soils and healthier plants are easily attained for turf management practices.

Enlivening Soil—Growing Turf with Healthier Soils

The soil you grow in makes all the difference in healthier plants. In this seminar Rick discusses the vitality of soil and how it contributes or hinders the health of turf and turf management practices.

Removing the Environmental Pollutants Seamlessly

Sludge, anaerobic black-layer, gasoline spills, lakes with odors are groundskeeper's on-going dilemma. Rick shows how soil and water environments can be returned to a healthier balance with low cost, highly effective environmentally sound solutions.
